

Pipeline Safety

Northern is committed to ensuring the safe operation of its natural gas pipeline systems. According to the Federal Department of Transportation, the transmission of natural gas through interstate pipelines is the safest means of transportation in the United States. The industry enjoys an excellent safety and reliability record.

At Northern, safety is paramount. The safety of the employees and the general public is assured throughout each step of new construction. The United States Department of Transportation considers natural gas pipelines as one of the safest modes of energy transportation. Our company meets and often exceeds all appropriate safety regulations and works closely with all regulatory agencies. Our safety record is consistently at the top of our peer groups. Maintaining worker and public safety and caring for the environment - before, during and after construction - are our highest priorities.
