BELLEVILLE NOMINATION ZONE D GROUP

ALLOCATION BACKGROUND	Favorable East Leg pricing caused market area shippers to nominate increased quantities of interruptible and alternate firm transactions through Belleville. This resulted in constraints through the Belleville compressor station. In order to better effectuate capacity allocations at the smallest affected area in the market area, Northern established a Belleville Nomination Zone D (Group 488).
ALLOCATION CRITERIA	Nominations for delivery downstream of the Belleville, Wisconsin compressor station to the end of Northern's pipeline in Zone D exceed the capacity of Northern's Belleville compressor station.
