

Galena East Nomination Group

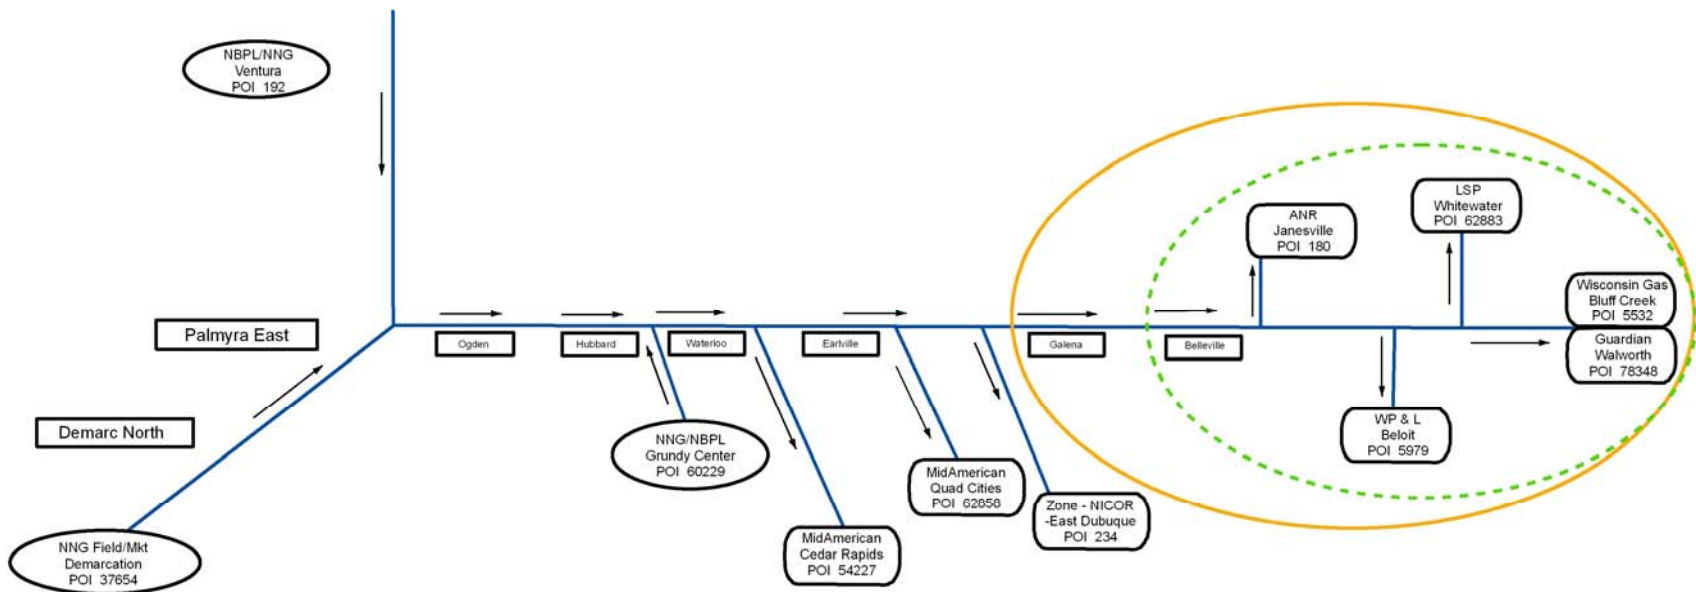

GALENA EAST NOMINATION GROUP

ALLOCATION BACKGROUND	Favorable East Leg pricing caused market area shippers to nominate increased quantities of interruptible and alternate firm transactions through the Galena compressor station. This resulted in constraints through the Galena compressor station. In order to better effectuate capacity allocations at the smallest affected area in the market area, Northern established the Galena East Nomination Zone Points (Group 463).
ALLOCATION CRITERIA	Nominations for delivery downstream of the Galena, Illinois compressor station to the end of Northern's pipeline in Zone D exceed the capacity of Northern's Galena compressor station
ALLOCATION BACKGROUND	Summer – 303,000 Dth Winter - 323,000 Dth
ALLOCATION SPECIFIC DETAILS	<p>Shippers nominating at a zone level will be presumed to have nominated pro-rata based on the entitlement at the affected Zone D delivery points listed provided in link below. The pro-rata share will be calculated by the percentage of the Firm MDQ contracted at each of the identified Zone D delivery points relative to the Shipper's total contracted firm MDQ at Zone D.</p> <p>When shippers nominate directly at any of the points listed below rather than at the zone level, the nominated quantity at the point will be included in the allocation.</p> <p>The group capacity will be allocated based on the following priority of service:</p> <ol style="list-style-type: none"> 1. First off (lowest priority) – Interruptible nominations are allocated by price 2. Next off – Alternate Firm Delivery Point sourced from Alternate Firm Receipt Point (allocated pro rata) 3. Next off – Alternate Firm Delivery point sourced from a Primary Firm Receipt Point and Primary Firm Delivery point sourced from an Alternate Firm Receipt Point (allocated pro rata). 4. Last off (highest priority) - Primary Firm Delivery point sourced from Primary Firm Receipt (allocated pro rata).
