Re: Approval of Expanded Receiver/Valve Site —Rockford to Buffalo Greenfield Lateral

Dear Mr. Loeffler:

I approve Northern Natural Gas Company's (Northern's) September 3, 2019 request to expand the approved receiver/valve site, at approximately mile post 9.9 on the Rockford to Buffalo Greenfield Lateral, 50 feet to the east to better accommodate access to the end of the receiver. Northern has documented that this modification overlaps with the previously approved staging area and would not affect environmentally sensitive resources. Northern has obtained permission from the landowner for expanded permanent site. In addition, we have confirmed the receipt of all required authorizations relevant to the approved activities herein.

Your request is in compliance with environmental condition 4 of the Commission's February 21, 2019, *Order Issuing Certificate* (Order) in above-referenced docket. I remind you that Northern must comply with all applicable remaining terms and conditions of the Order. If you have any questions regarding this approval, you may contact me at 202-502-8130.

Sincerely,

Julia Yuan
Environmental Project Manager
Division of Gas – Environment
and Engineering
