Re: Authorization to Commence Service of the Hinckley Compressor Station

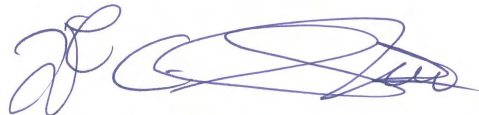

Dear Mr. Loeffler:

I grant your November 23, 2021 request for Northern Natural Gas Company (Northern) to place into service the Hinckley Compressor Station in Pine County, Minnesota, associated with the Northern Lights 2021 Expansion Project.

Your request is in compliance with environmental condition 10 of the Federal Energy Regulatory Commission's (Commission) May 20, 2021 *Order Issuing Certificate and Approving Abandonment* (Order) issued in the above-referenced docket. Based on Northern's biweekly construction status reports and photo documentation, I find that Northern has adequately stabilized the workspaces at the Hinckley Compressor Station and that restoration is progressing satisfactorily. I understand Northern will continue to monitor the stabilization of disturbed areas and will update Commission staff on the project's restoration activities in Northern's biweekly status reports.

I remind you that Northern must comply with all remaining terms and conditions of the Order. If you have any questions regarding this approval, please contact Doug Cotton at (202) 502-6590.

Sincerely,

for J. Rich McGuire
Director, Division of Gas –
Environment and Engineering
