TSP: 784158214
Post Date / Time: 05/21/2018 07:30 AM
Effective Gas Day: 06/01/2018
Ending Effective Gas Day: 05/31/2999
Measurement Basis Description: MMBTU (Dth)

UNSUBSCRIBED FIRM DEFERRED DELIVERY CAPACITY

Comments:

The following is Unsubscribed Firm Deferred Delivery (FDD) Capacity offered in accordance with Section 26 of the General Terms and Conditions of Northern’s FERC Gas Tariff. FDD capacity is available for annual cycle period terms of one year or more. A cycle period starts June 1 and ends May 31 of the following year. The unsubscribed capacity listed is for informational purposes only and can change at any time, without notice, due to firm requests. This capacity is available in accordance with the rates, terms, and conditions of Northern’s FERC Gas Tariff. Northern is not required to execute any contract for service at less than maximum rates.

Requests will be processed in the order they are received.

Alternate Bid Methodology – If multiple requests are received for available capacity, then the capacity will be awarded to the best bid, portions of bids, or combination of bids that results in the highest total net present value of reservation revenue to Northern on a per unit of capacity basis. The NPV calculation shall include only revenues generated by the reservation rate and capacity fee. In the event equivalent offers are submitted, the capacity will be awarded pro rata to the equal bidders.

Northern will not enter into a contract with an effective date greater than 12 months into the future to the extent Northern determines that there is a ROFR risk (a risk of selling the capacity prior to the future effective date for a term of one year or longer resulting in the right of first refusal being applicable to the earlier term capacity which could cause Northern to have to construct facilities to serve either or both shippers).
